# ABOUT US

Established in 1997, we at R K Knit Fab are a leading manufacturer and wholesaler of various types of knitted fabrics, including T-shirt fabric, polyester knitted fabric, dry-fit fabric, micro polyester fabric, fleece fabric, and more. R K Knit Fab is one of the most successful fabric manufacturers in India.

We have developed a versatile production chain that allows us to handle flexible orders with shorter lead times. As an industry-standard certified company, we guarantee a perfect blend of quality and efficiency. With over 28 years of accomplishments, R K Knit Fab aims to lead the competitive fabric sector in India.

We have continuously re-engineered each step of our value chain to keep pace with the dynamic fashion market. Our company has expanded its production capacity, developed a skilled workforce, and implemented integrated technologies to stay globally competitive.

Located in Ludhiana, R K Knit Fab has a proud history and a bright future. Today, after more than two decades of growth, we are recognized as a pioneer in the Indian textile industry and the prime choice for many retailers, with an impressive capacity of 300 tons of fabric per month.

We are thankful to Mr. Mohit Bhalla (Managing Director) and Mr. Kartik Bhalla (CEO) for their continuous support and guidance, which have been instrumental in our exponential growth in the current market.

# SAP MATTY(mars knit)

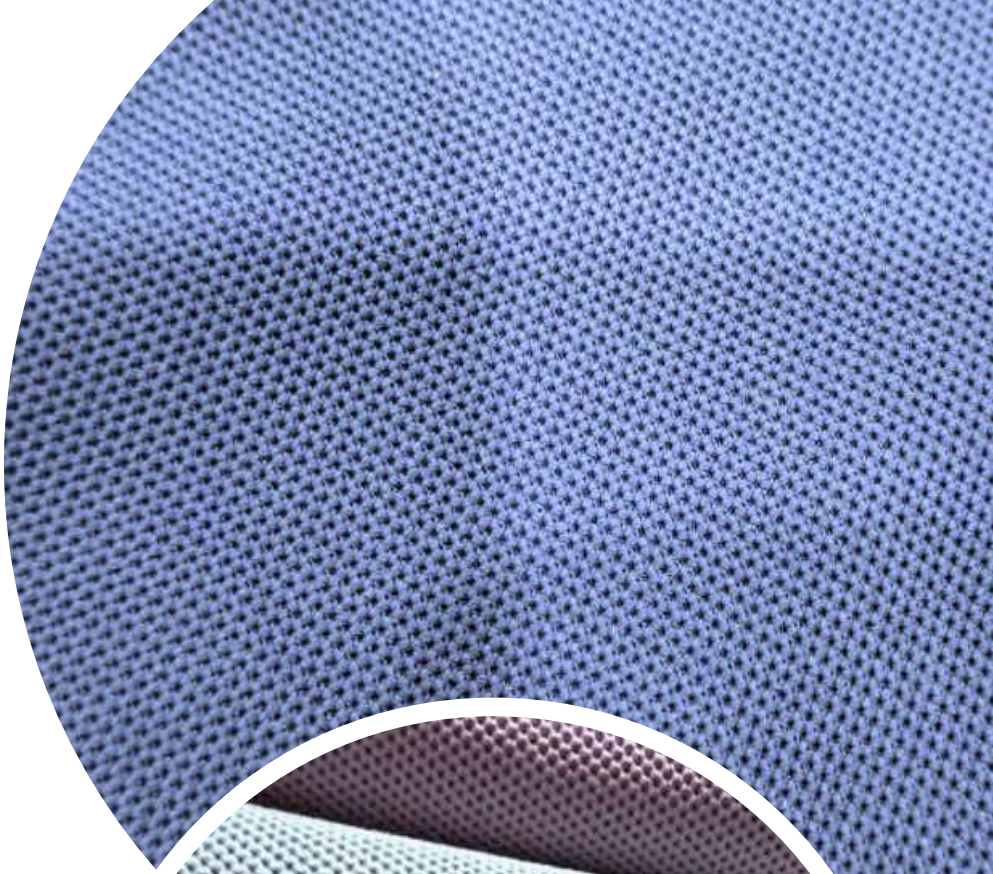
The SAP (Synthetic artificial polyester) designation indicates a smooth finish and full dull describes the yarn's non shiny nature. Sap Matty full dull is a knitted polyester fabric known for its soft textured finish

✨ **Key Characteristics:**

- Breathability
- Durability
- Moisture wicking
- Colour fastness
- Versatality
- Made With 100% Polyester
- **Yarn Type:** Full dull High Quality micro poly yarn

✨ **Application :**

- Polo
- Sportswear
- Uniform



# SPUN HONEYCOMB

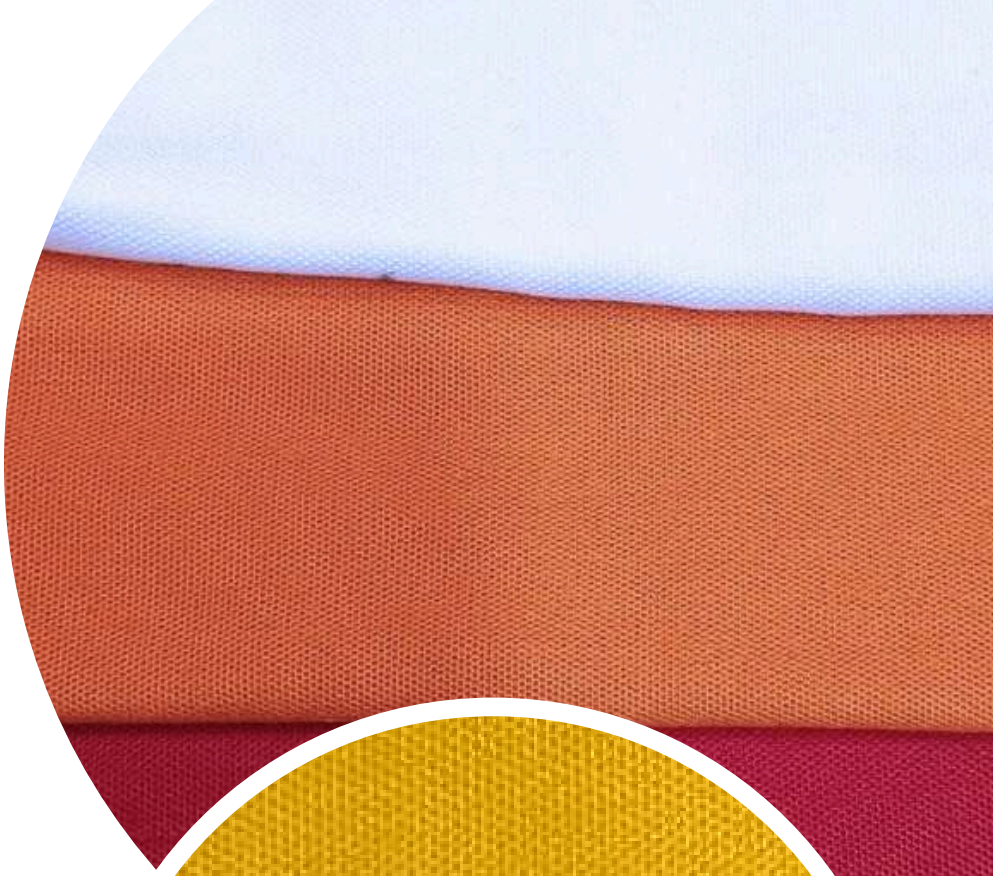
The honeycomb fabric typically refers to honeycomb structure of pattern

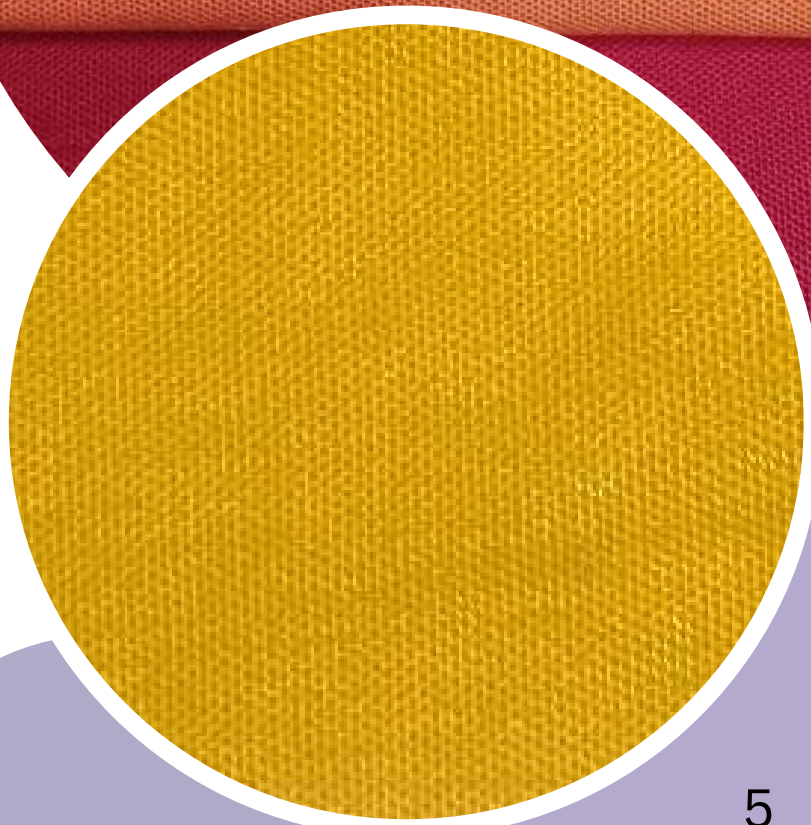
✨ **Key Characteristics:**

- Lightweight
- Strong
- Hexagonal pattern allows air circulation&heat dissipation
- **Yarn Type:** 100% polyester

✨ **Application :**

- Sportswear





# SPUN P.KNIT

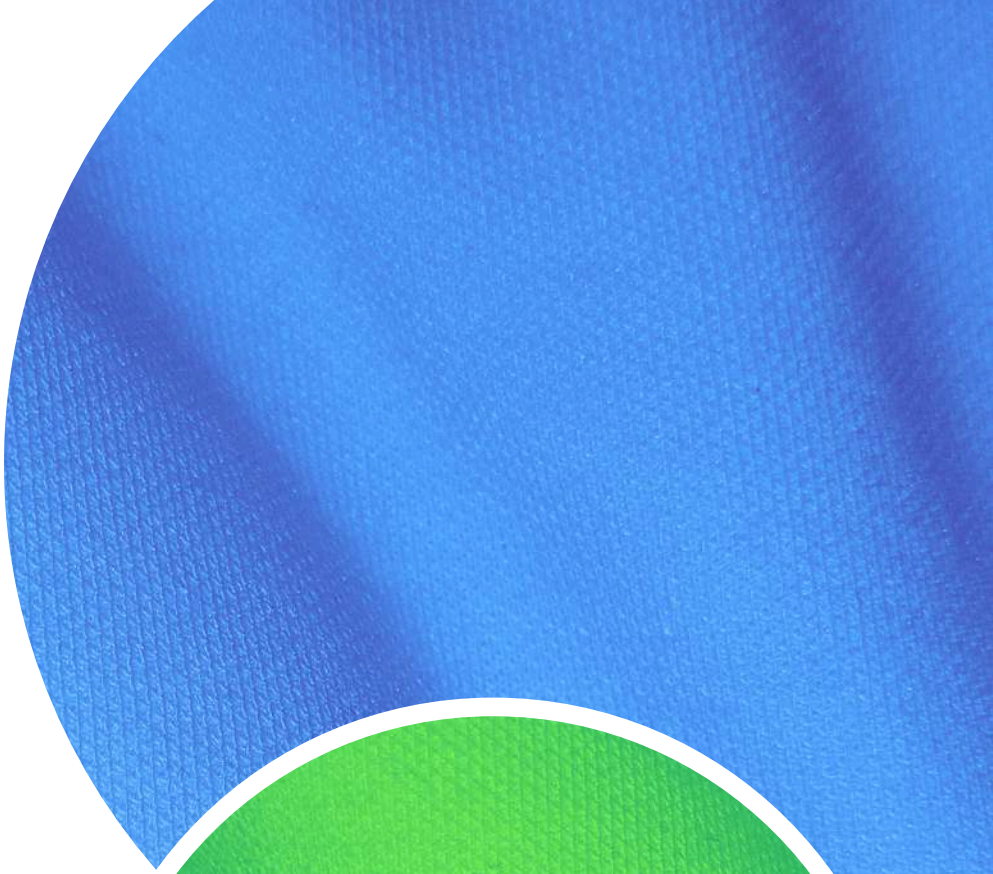
Spun Pknit fabric is a soft, durable, and breathable knit made from spun yarns, which are created by twisting short fibers. It offers the comfort of natural fibers along with the strength of synthetic blends, making it ideal for casual wear, sportswear, and comfortable apparel.

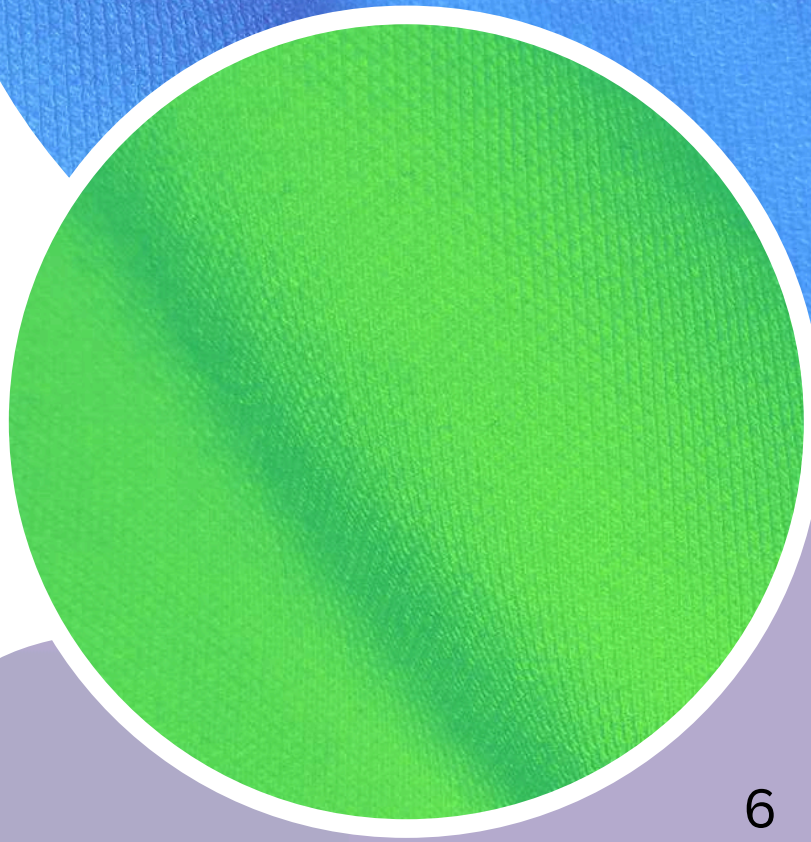
✨ **Key Characteristics:**

- Soft & comfortable
- Durable
- Breathable
- **Yarn Type:** 100% Polyester

✨ **Application :**

- T-shirts and Polo shirts
- Leggings and Track pants
- Casual and Lounge wear





# SPUN SINKER

Spun Sinker fabric is a knitted fabric made from spun yarns using sinker circular knitting machines. Known for its softness, durability, and breathability, this fabric features a balanced structure with excellent stretch and recovery, making it ideal for casual and active wear.

✨ **Key Characteristics:**

- Soft & comfortable
- Durable
- Moisture absorbant
- Good Air Permeability
- **Yarn Type:** 100% Polyester

✨ **Application :**

- T-Shirts & Polo Shirts
- Track Pants & Leggings
- Casual and Sportswear
- Uniforms & Innerwear
- Home Textiles (like pillow covers or light upholstery)

# SAP WAFFLE

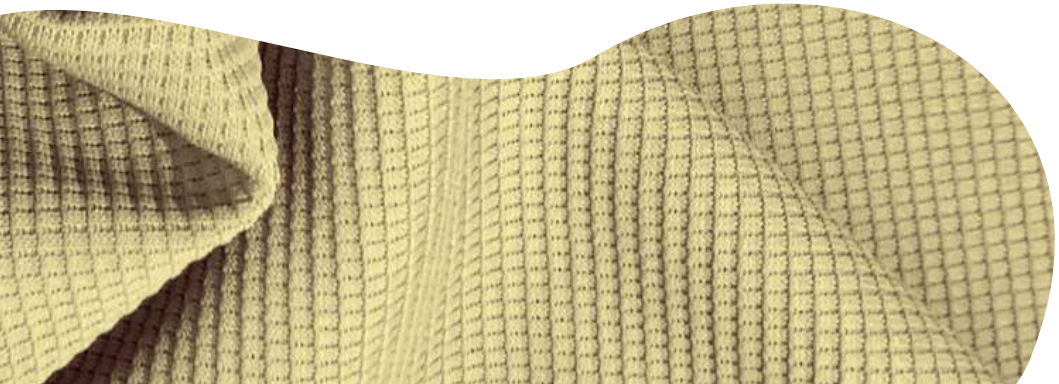
SAP Waffle Full dull yarn fabric is 100% polyester. the fabric freature is a distinctive waffle texture, the structure traps Air.

✨ Key Characteristics:

- Appearance matte
- Soft non-shiny
- Grid-like Surface
- Highly absorbent
- Resistant to shrinking and fading
- Good air circulation
- Yarn Type: 100% Polyester Full dull yarn

✨ **Application:**

- T-shirts
- Activewear
- Home Textiles like towels and bathrobes



# MINI WAFFLE

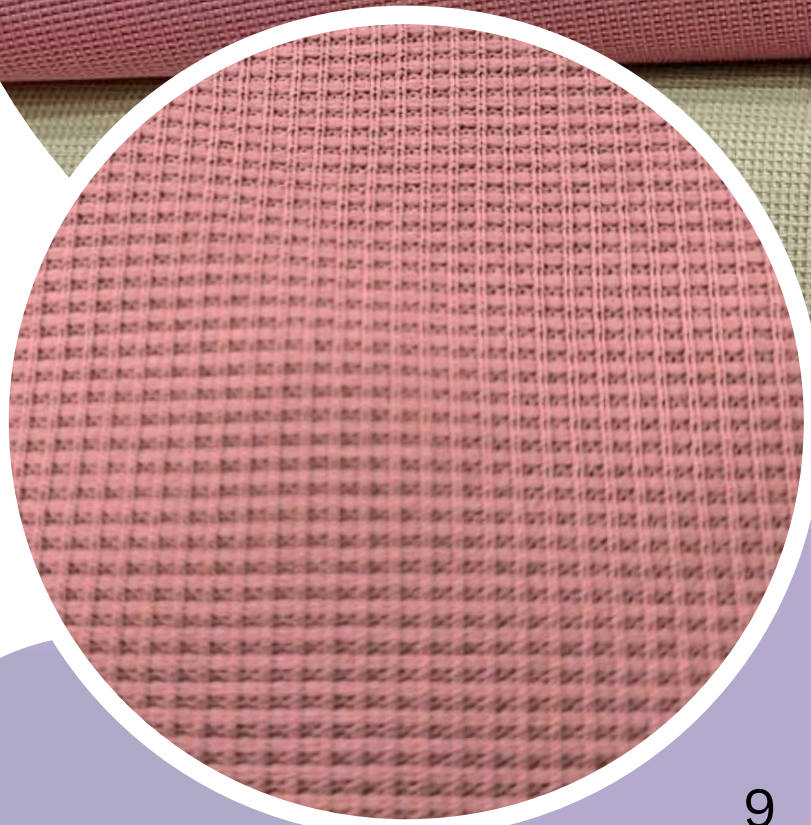
This refers to the fabric's 3D grid like texture (a smaller version of the classic waffle pattern) Created by specific Knit

✨ **Key Characteristics:**

- Enhanced absorbance
- good air circulation
- air insulation
- quick dryeing
- lightweight
- **Yarn** : 100% Polyester full dull yarn

✨ **Application:**

- Activewear
- loungewear
- Home textile
- T-shirts



# DOT KNIT full dull

It combines a textured dotted knit pattern with a matte non shiny finish

✨ **Key Characteristics:**

- Full dull finish
- Good air circulation
- moisture wicking
- Easy care
- Wrinkle resistant
- YARN: 100% Poly full dull yarn

✨ **Application :**

- Activewear
- Dresses
- Fashion Accesories
- T-shirts

It can be produced in various thickness(GSM) and width.

# MICRO DOT KNIT

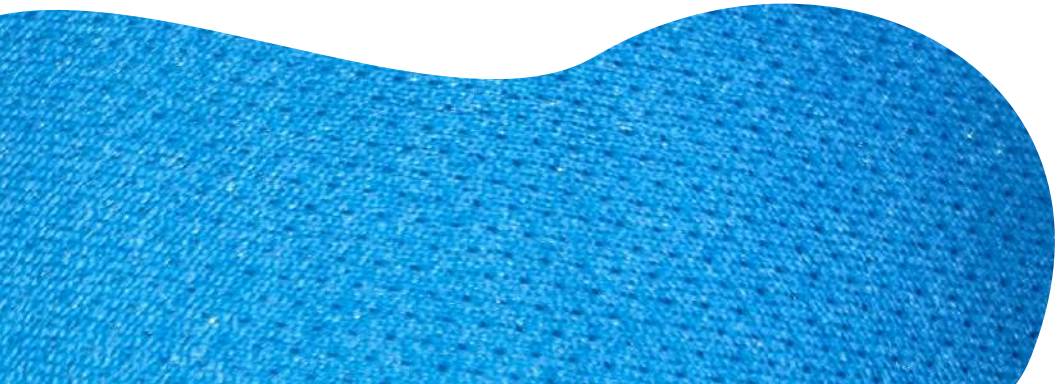
Produced through a specialized knitting process that creates a unique textured surface characterized by small reused dots.

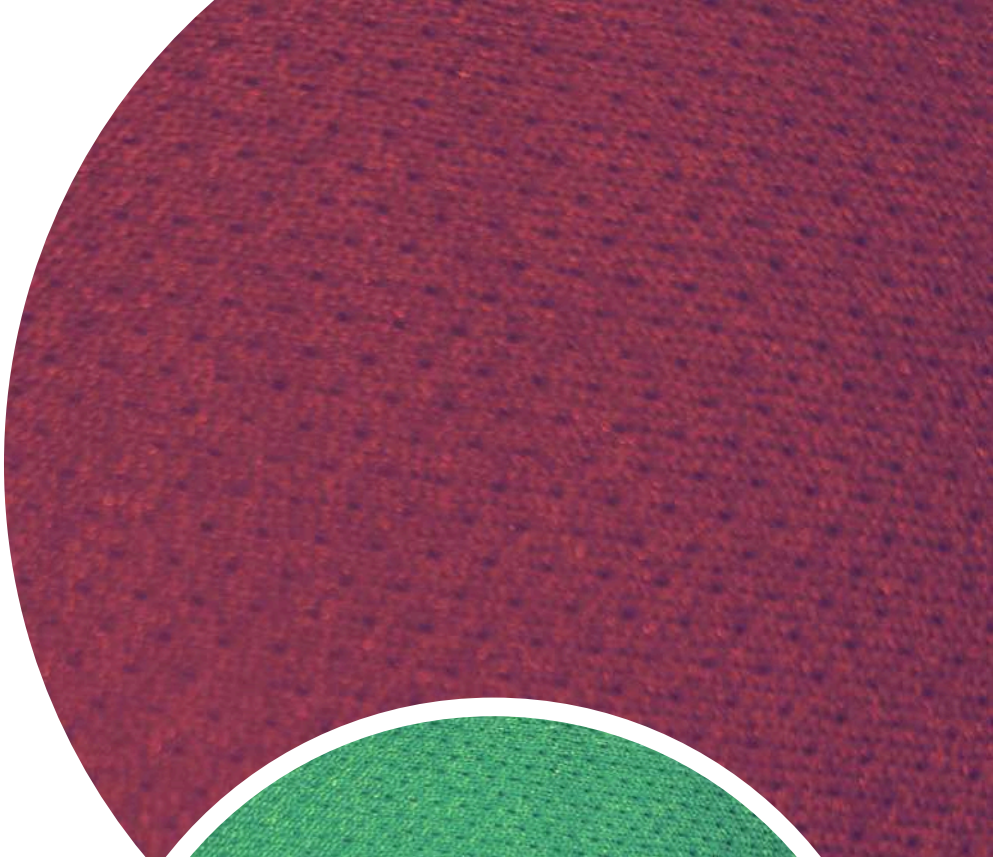
✨ **Key Characteristics:**

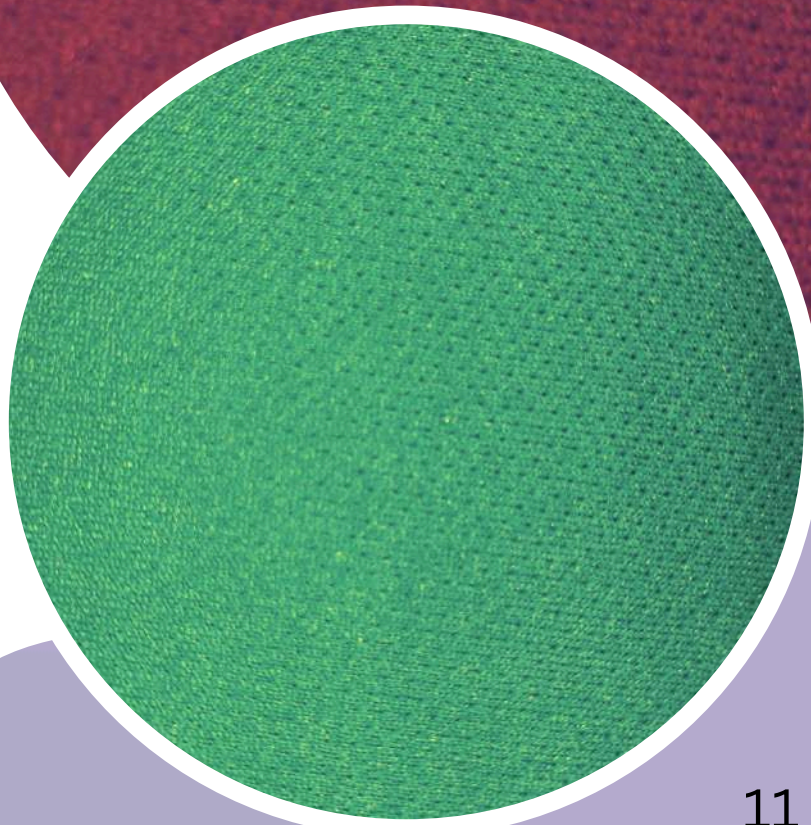
- Washable
- Shiny
- Lightweight
- Breathability
- Durability
- **YARN:** 100% Poly micro yarn

✨ **Application :**

- Sportswear
- Apparel
- clothing







# RICE KNIT

It is characterized by its unique weaving surface resembling rice grains

✨ **Key Characteristics:**

- Softness
- Texture
- Apperance
- Moisture wicking
- Durability
- Easy to maintain wrinkle resistance
- **YARN:** 100% Poly micro yarn

✨ **Application :**

- Sportswear
- Activewear
- Casual wear

# MICRO P.P.

The term micro refers to the extra fine filaments used white full dull refers to the matte finish

✨ **Key Characteristics:**

- Softness and comfort
- lightweight
- quick drying properties
- chemical resistance
- YARN: 100% full dull Polypropylene

✨ **Application :**

- Activewear
- Casual wear
- Sports wear
- T-shirts

# ZIG ZAG

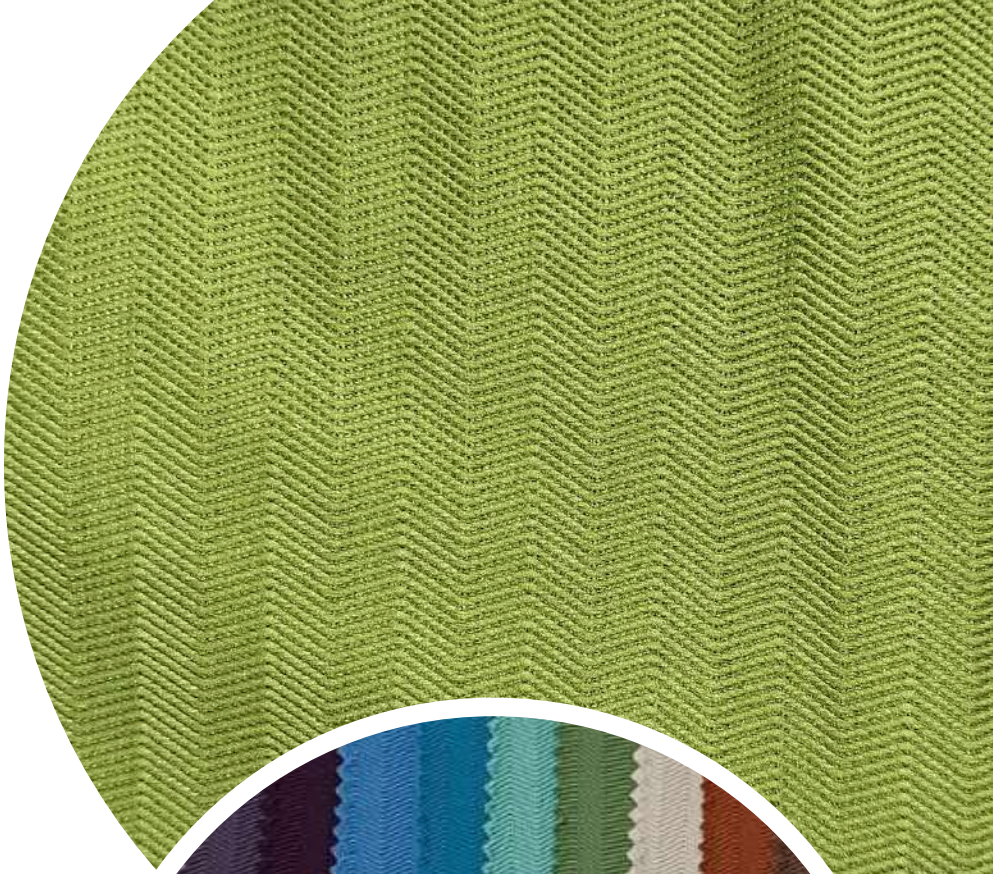
It combines a distinctive zig zag pattern wih yarn that has a non reflective matte finish

✨ **Key Characteristics:**

- Soft, matte and premium cotton like looks and feel
- High tensile strength
- Good stretch and flexibility
- Retains colour
- YARN: 100% polyester full dull

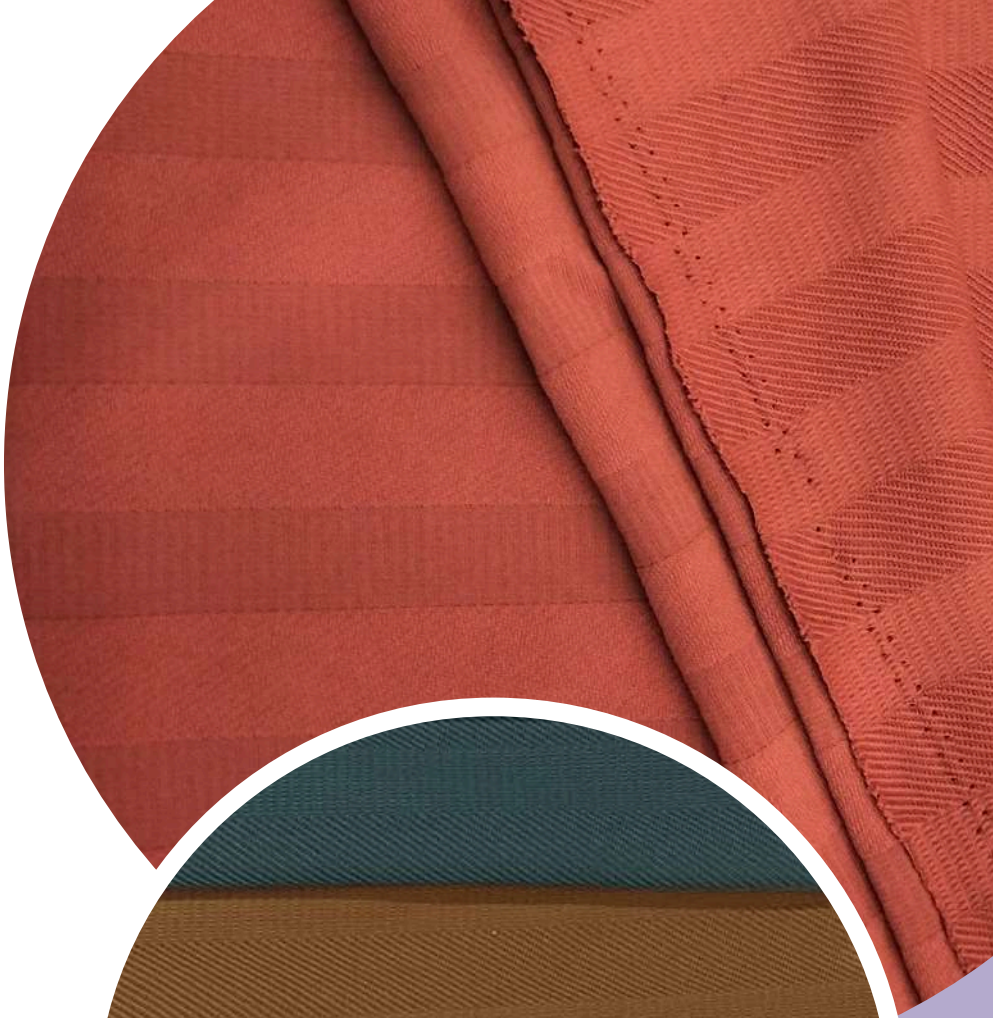
✨ **Application :**

- Athletic & Active wear
- Home textile



# KIT KAT

The kit kat refers to a specific fabric construction or texture popular in the textile market

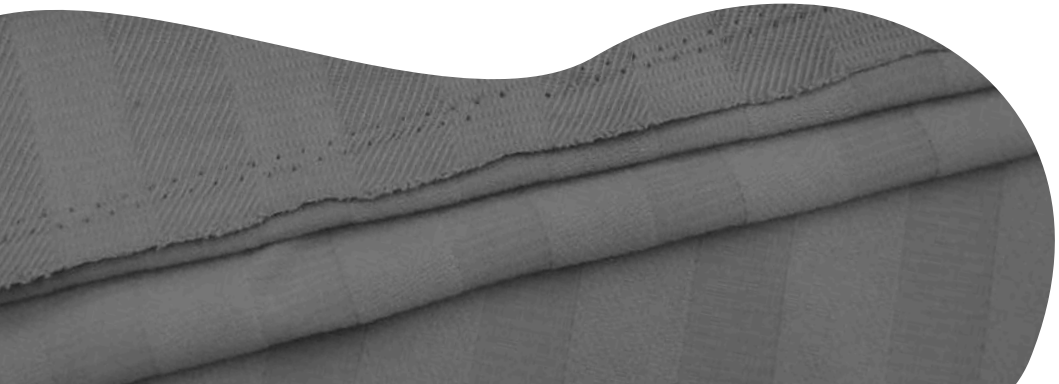


✨ **Key Characteristics:**

- High tenacity and strength
- moisture wicking
- Anti-bacterial ,anti-pilling, eco friendly
- YARN: 100% Polyester

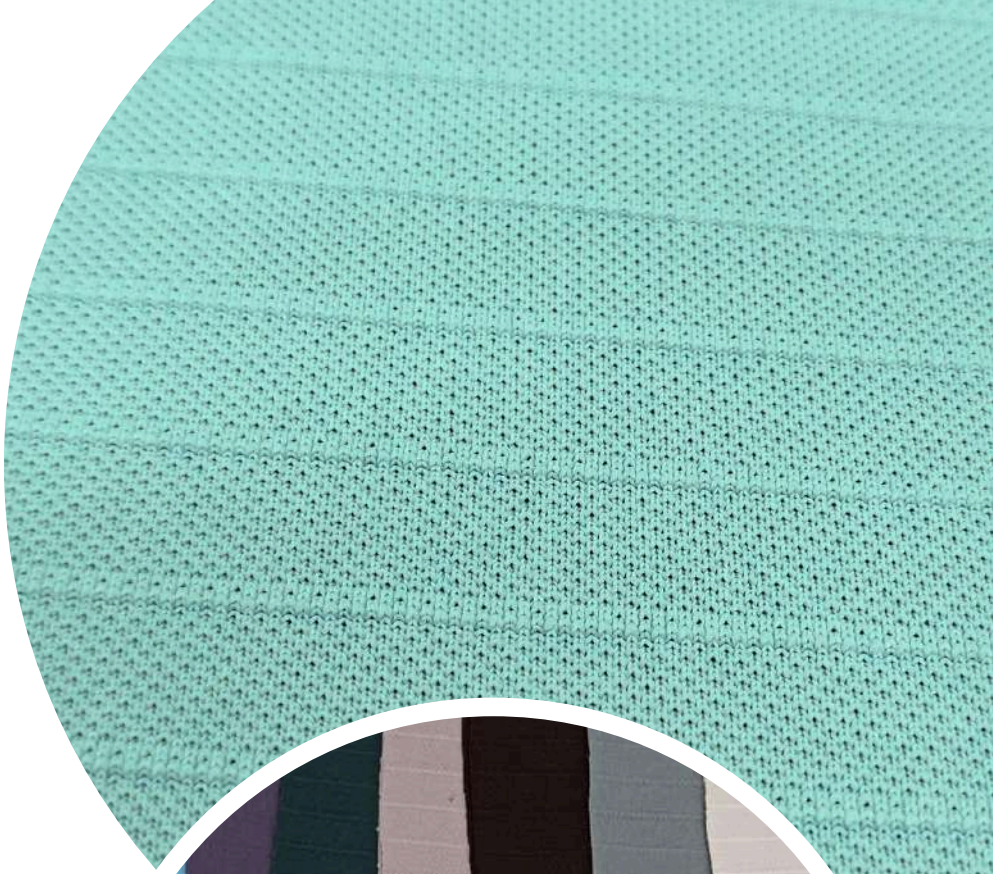
✨ **Application :**

- Sportswear
- Athleisure
- T-shirts
- Tops



# MILANO

It has a small drapey texture with a fine vertical rib on the face and a diagonal structure on the reverse. it refers to the knitted structure.



✨ **Key Characteristics:**

- Strong
- Resilient
- Resistant to wrinkle and shrinking
- U-V Protection
- YARN: 100% full dull Polyester

✨ **Application :**

- Active wear
- Home textiles
- Uniforms

# VALENCIA

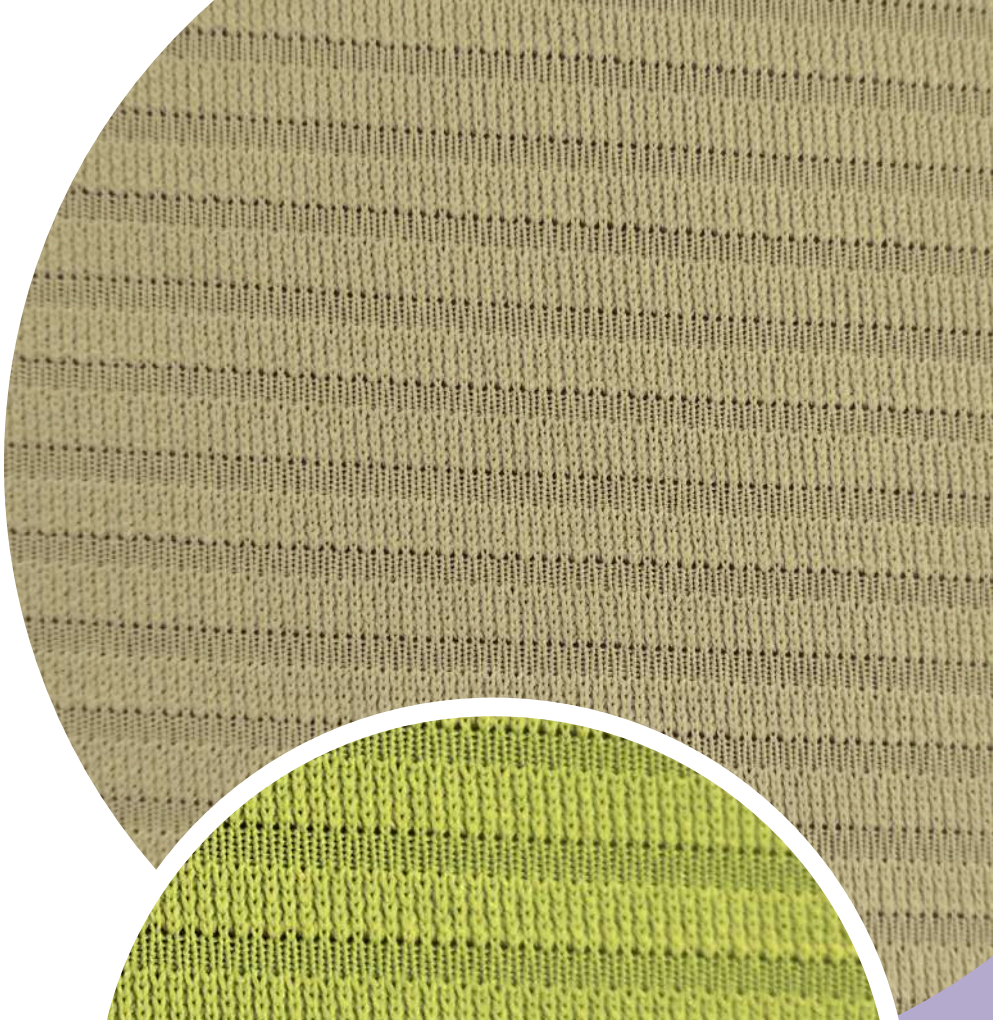
Valencia refers to a texture made using full dull yarn. valencia implies certain quality or style, e.g natural feel

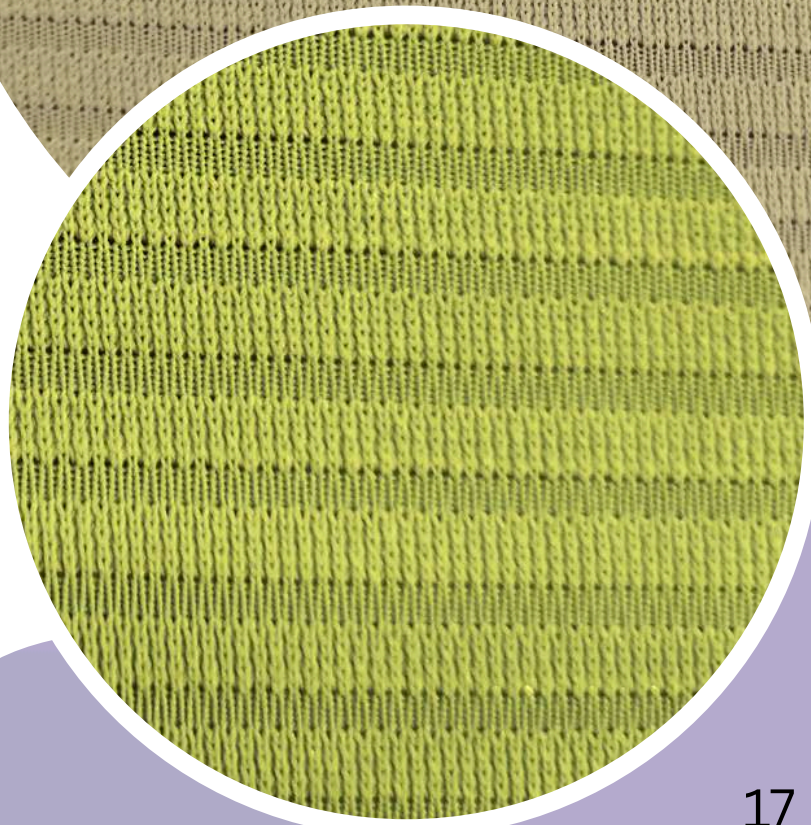
✨ **Key Characteristics:**

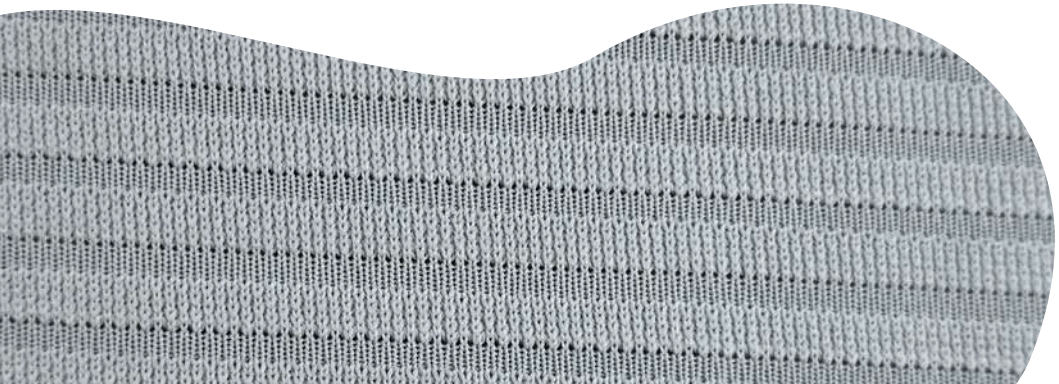
- Matte finish
- Visual Appeal
- Good elasticiy
- Strong Covering
- YARN: 100% full dull Polyester

✨ **Application :**

- Apparel
- Home textiles
- Technical textile

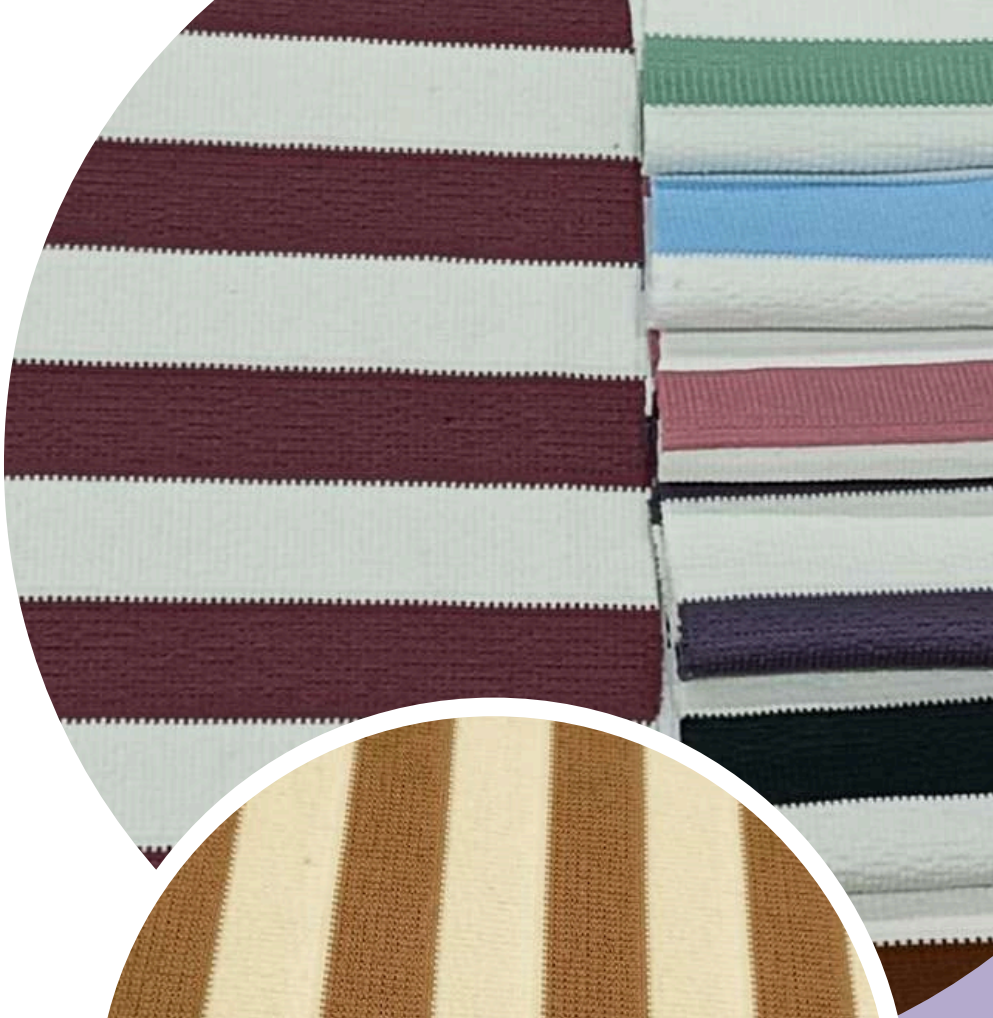






# TOWEL KNIT

It is an absorbent soft fabric with a matte appearance created using a knitting process that produces loops.



✨ **Key Characteristics:**

- Matte finish
- High strength
- Soft and comfortable
- Versatile
- Good drape
- YARN: 100% full dull Polyester

✨ **Application :**

- Towels
- Bathrobes
- Apparels such as sportwear and active wear

# CROCHET KNIT

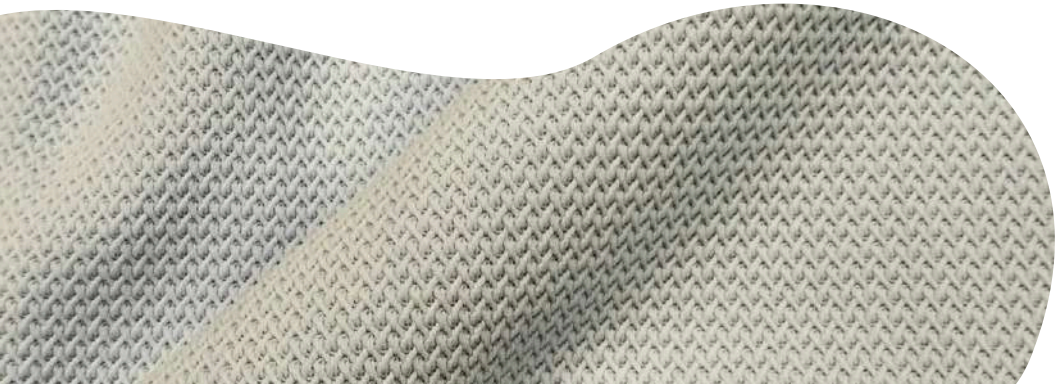
It is a fabric created using a knitting or crocheting process with yarn that completely non shiny matte finish.

✨ **Key Characteristics:**

- Soft
- Good drape
- High tenacity

✨ **Application :**

- Apparel like activewear and home textile



# OWL KNIT

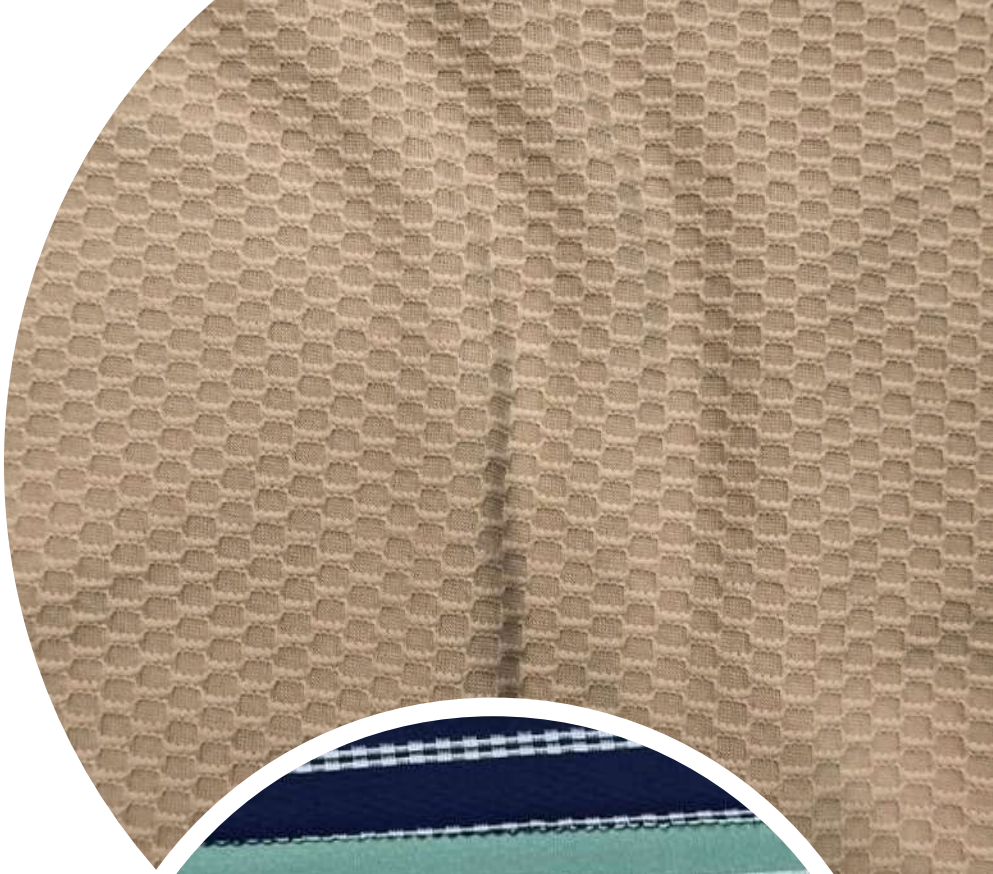
This knitted fabric features an owl pattern or design, t is produced by interlocking continuous chain's of yarn loops using needles.

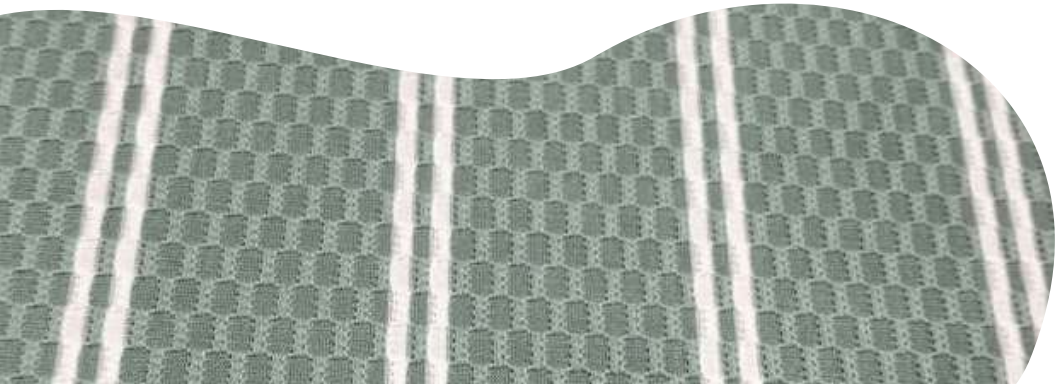
✨ **Key Characteristics:**

- matte cotton like apperance
- soft texture
- high strength
- Breaathability

✨ **Application :**

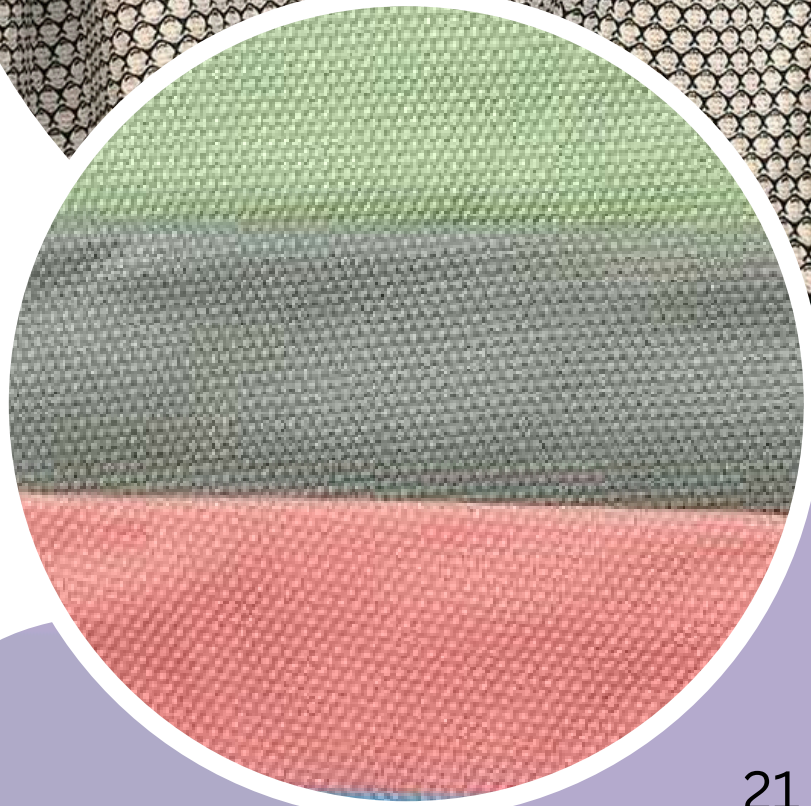
- Activewear
- Casual clothing like T-shirts





# POP CORN KNIT

It is a knit that combines a distinctive raised bumpy texture

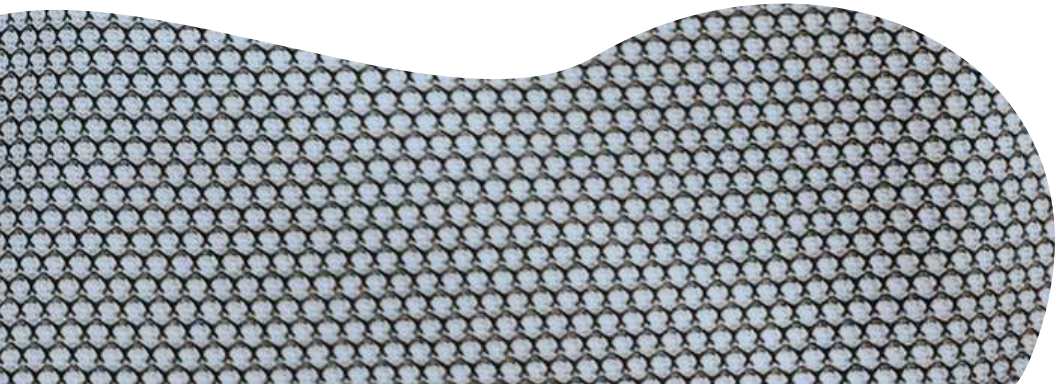


✨ **Key Characteristics:**

- soft hand feel
- natural stretch and adaptability
- resistance to wear&tear
- Low maintainance
- light weight
- Breathablility

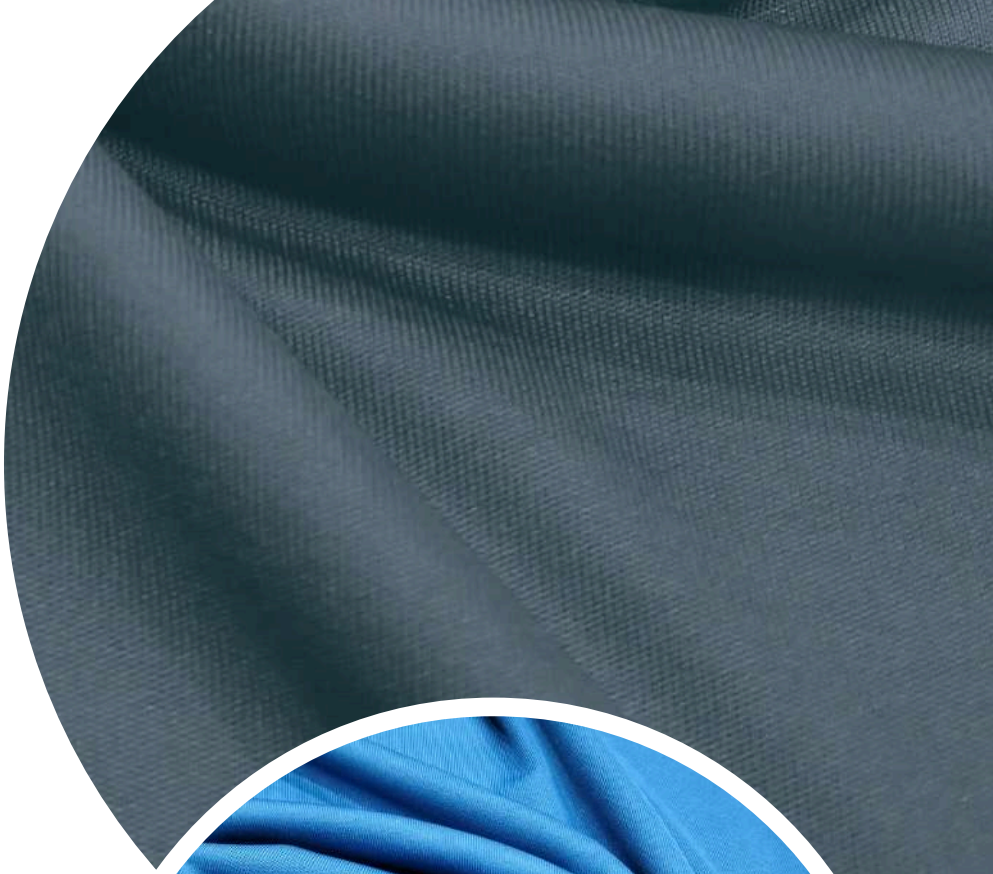
✨ **Application :**

- Activewear
- Sports wear
- loungwear



# SARINA

Sarina fabric a high quality fabric  made of 100% Polyester material



✨ **Key Characteristics:**

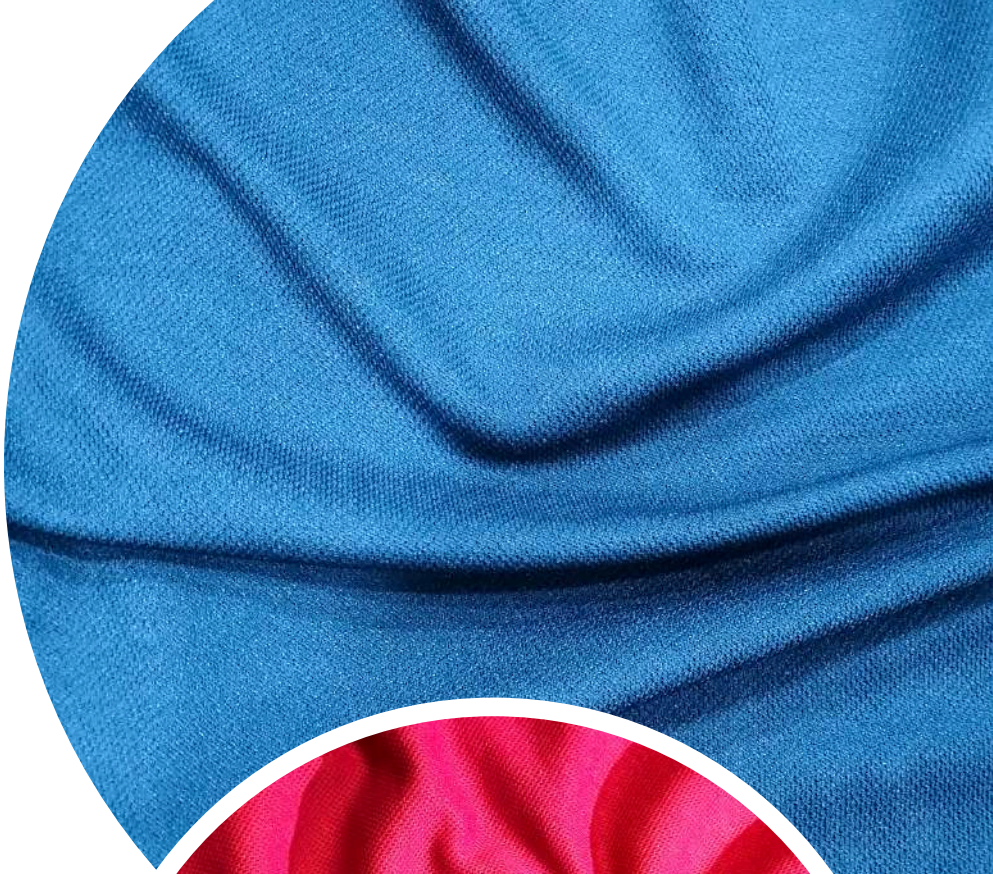
- Lightweight
- Colourfast
- Wrinkle resistance
- Durability

✨ **Application :**

- Activewear
- Clothing
- Home decor

# NIRMAL

A high quality plain style knit fabric made for garments industry



✨ **Key Characteristics:**

- Softness&Comfort
- Moisture management
- Lightweight
- Durability
- Wrinkle resistance
- Easy Care
- YARN: 100% micro poly yarn

✨ **Application :**

- Apparel
- Clothing
- Sportswear

# FOOTBALL KNIT

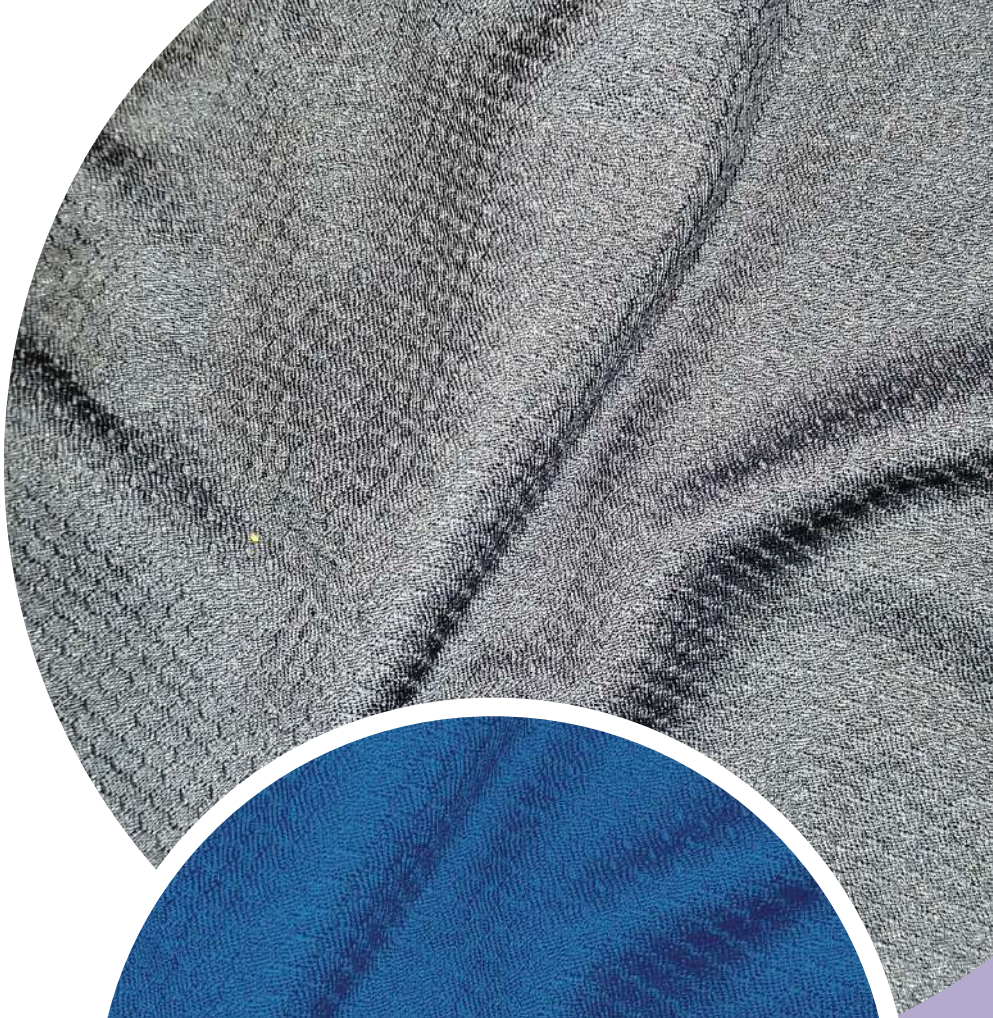
A football micro knit fabric is a specialized performance textile engineered for athlete apparel mainly football jerseys & uniform

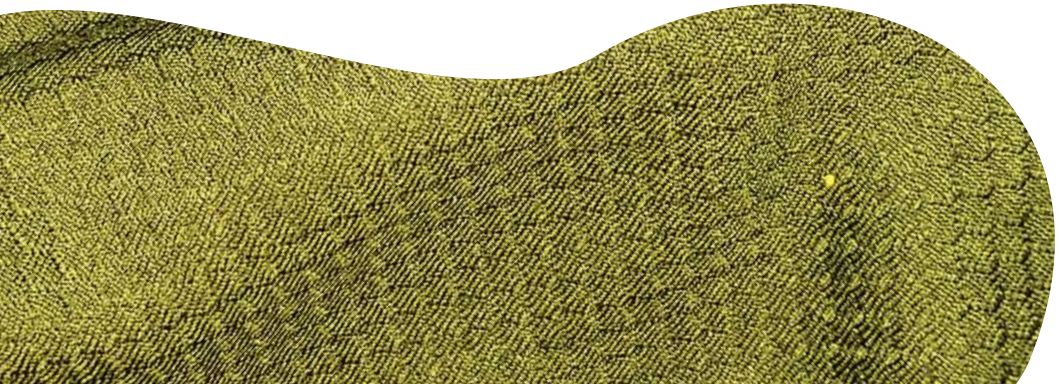
✨ **Key Characteristics:**

- Softness&Comfort
- Moisture management
- Odour Control
- Durability
- Wrinkle resistance
- Easy Care
- YARN: 100% micro poly yarn

✨ **Application :**

- Mainly used for atletic apparel sports uniform





# PC TENCEL

It is a blended fabric made from a mix of polyester and cotton fibres

✨ **Key Characteristics:**

- Pleasant to the skin
- moisture wicking
- Helps regulating body temperature
- Wrinkle Resistance
- Due to blend its more durable and Lower management
- **Comp:** blend % of polly and cotton

✨ **Application :**

- Activewear
- Lowers

# PC BIRDEYE

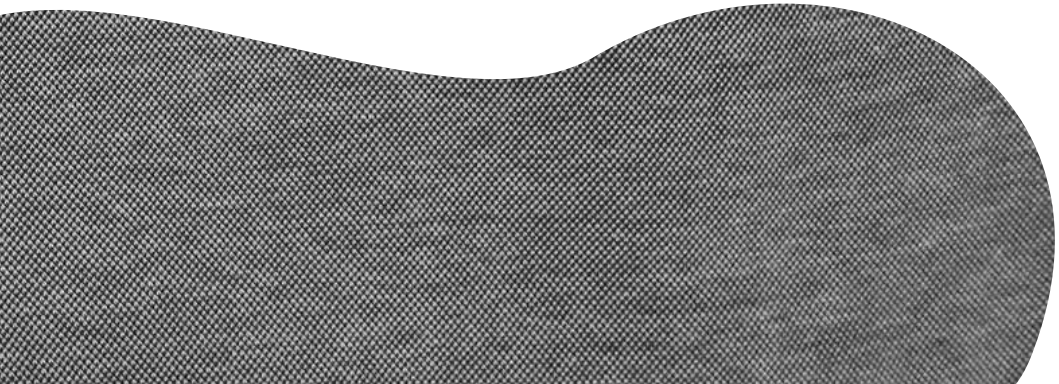
Birdeye referse to a specific type of weave on knit structure that creates a small, repetitive pattern of dots or diagonal shapes resemling the eye of a bird

✨ **Key Characteristics:**

- Pleasant to the skin
- moisture wicking
- breathable
- durable
- lightweight
- **Comp:** blend % of polly and cotton

✨ **Application :**

- Activewear
- Sportswear
- Uniforms



# PC INTERLOCK

Interlock is a blend of polyester and cotton. It is a double knit fabric with consistent appearance on both sides.

✨ **Key Characteristics:**

- Thicker & Stable then single jersey knit
- Soft and Comfortable
- good air circulation
- Easy to care and Wrinkle resistance
- **Comp:** blend % of polly and cotton

✨ **Application :**

- Hoodies
- Underwear
- Sportswear
- Activewear
- Sleepwear

# PC SINKER

The name sinker comes from specific knitting proves that creates a fabric with a smooth,firm texture

✨ **Key Characteristics:**

- Soft & Gentle
- Strong & Resilient
- Good flexibility
- **Comp:** blend % of polly and cotton

✨ **Application :**

- T-shirts
- Tops
- Lowers
- Activewear
- Night suits
- School uniform

# PC PIQUE

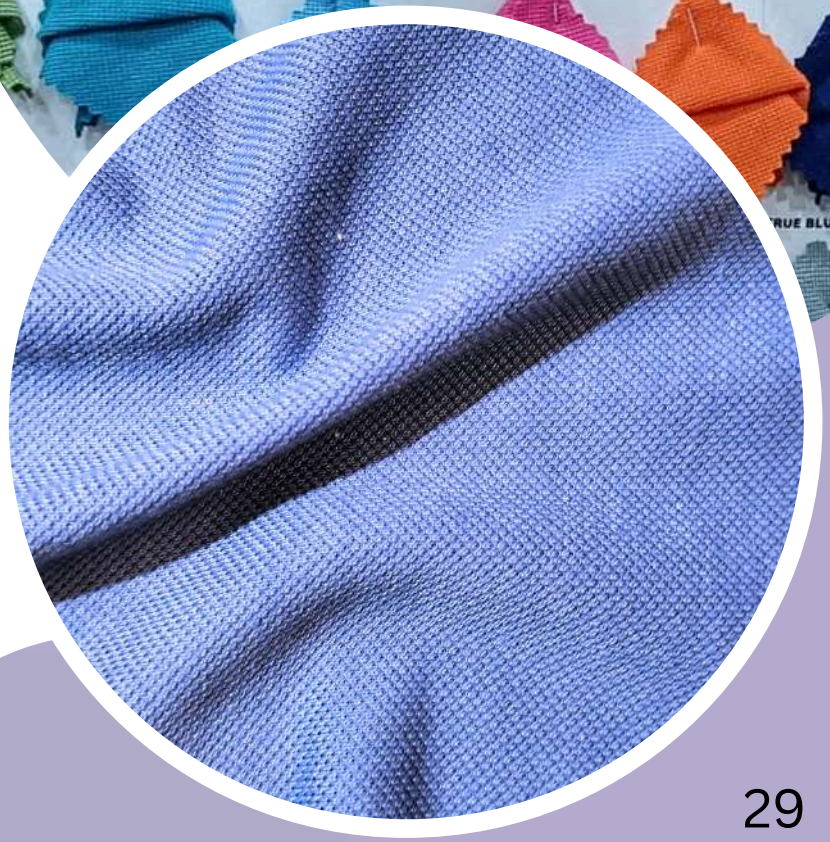
PC Pique is a textured fabric often with a waffle like or honeycomb weave.

✨ **Key Characteristics:**

- Comfortable
- Moisture wicking
- Resistant to stretch and holds its shape
- **Comp:** blend % of polly and cotton

✨ **Application :**

- Uniforms
- Polo's
- Sportswear



# AIRJET SINKER

Airjet sinker fabric is a type of knitted fabric made by combining the airjet and sinker knitting process

✨ **Key Characteristics:**

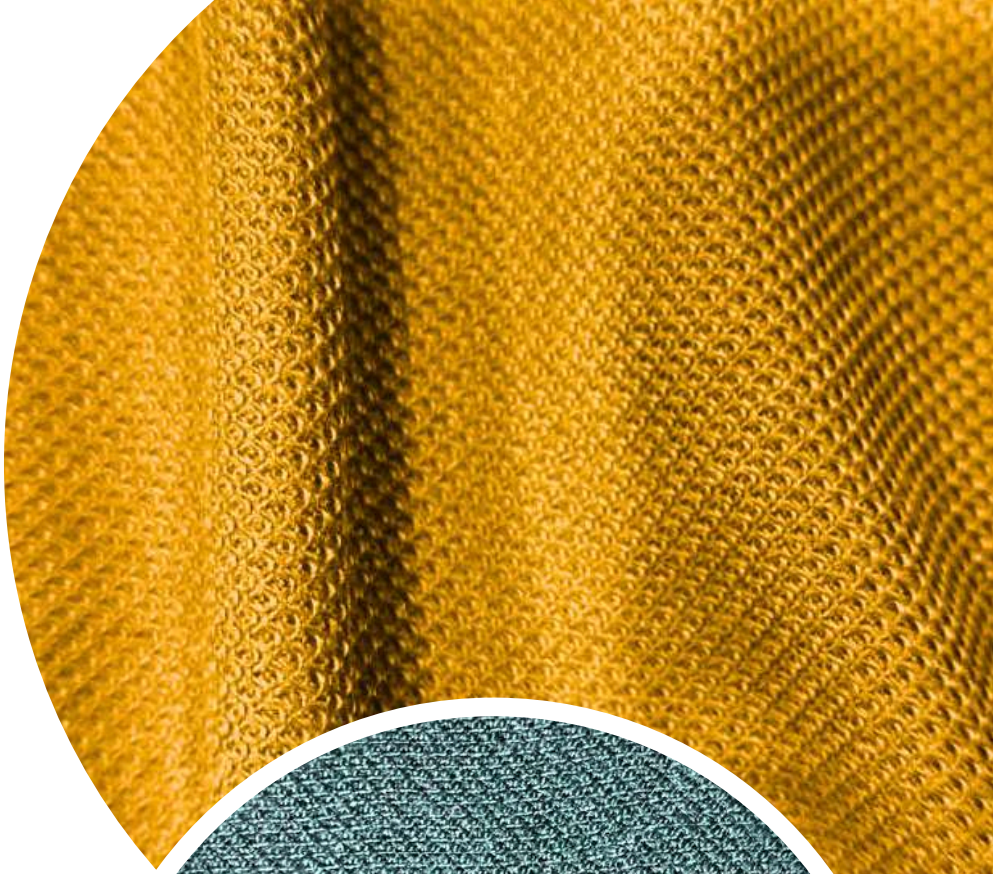
- Soft&Comfortable
- Durable
- Breathable
- Colourfast and anti-bubbling
- **Comp:** blend % airjet and spun yarn

✨ **Application :**

- Apparel like nightsuit t-shirt
- uniforms

# AIRJET MATTY

It is a type of material that combines yarn produced using airjet spinning machine with a distinctive matty weave knit texture



✨ **Key Characteristics:**

- 3D Textured surface
- Resistant to pilling
- Moisture absorption
- Easy care
- **Comp:** blend % airjet and spun yarn

✨ **Application :**

- Apparel like T-shirts school&corporate uniforms
- Sportswear and Activewear

# LOOP KNIT

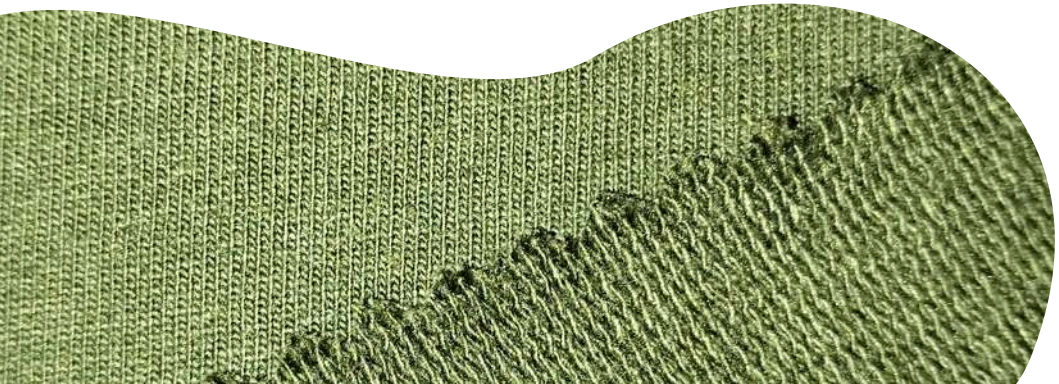
It is a type of knitted fabric that features loop's on its surface

✨ **Key Characteristics:**

- Unique textured look
- Softness
- Comfort
- maintains shape and elasticity
- Quick drying
- **Comp:** blend % airjet and spun yarn

✨ **Application :**

- T-shirt
- Track pants
- Jogger's
- Hoodies
- Sportswear apparel



# RUSSIAN FLEECE

It is a specific type of polyester fleece fabric that is warm,soft and insulating designed for cold weather

✨ **Key Characteristics:**

- Softness
- warmth
- Moisture wicking
- Durability
- **Comp:** 100% Polyester

✨ **Application:**

- Jackets
- Sportswear
- blankets

# SPUN FLEECE

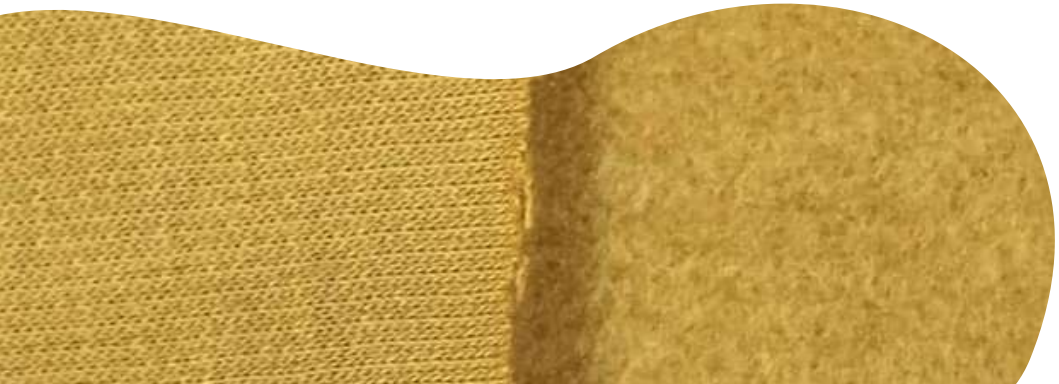
Spun fleece is a soft cozy fabric made from spun polyester fabrics that are knitted together

✨ **Key Characteristics:**

- Warm & lightweight
- Soft and comfortable
- Breathable
- Durable
- **Comp:** 100% Polyester

✨ **Application :**

- Jackets
- Sweatshirts
- blankets



# PC FLEECE

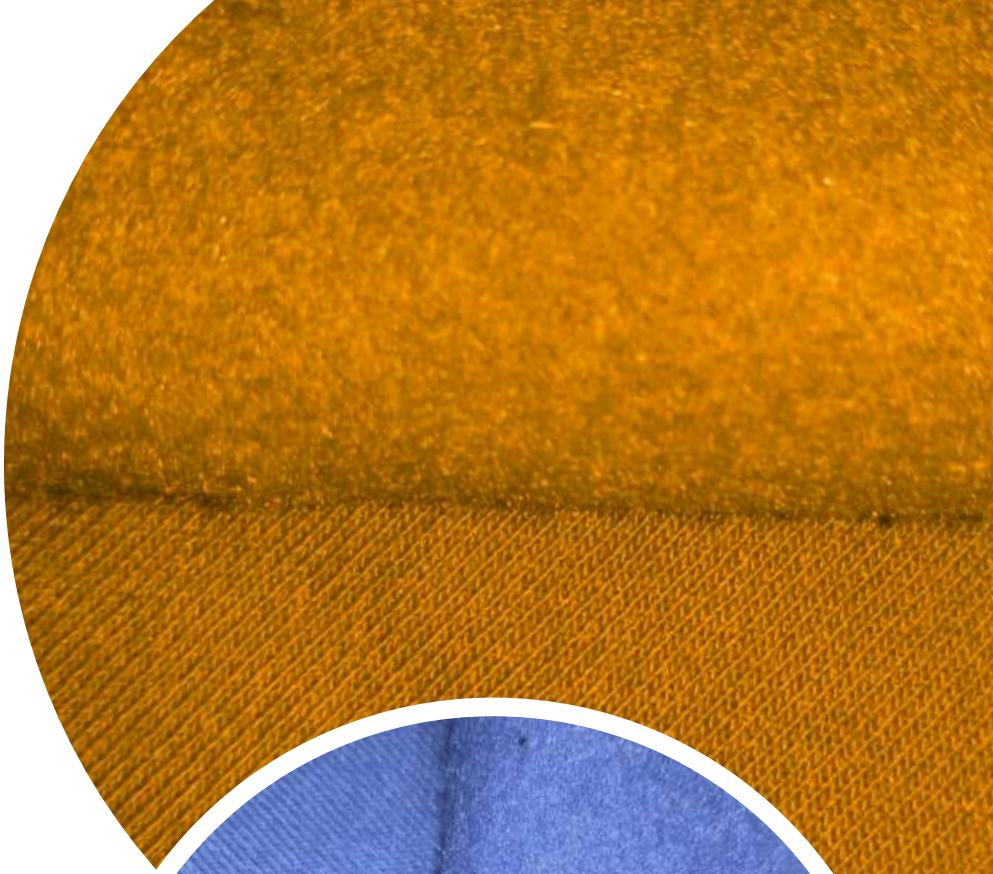
Pc fleece is a blend of polyester and cotton created to combinde the durability and wrinkle resistence of polyester with the softness and comfort of cotton

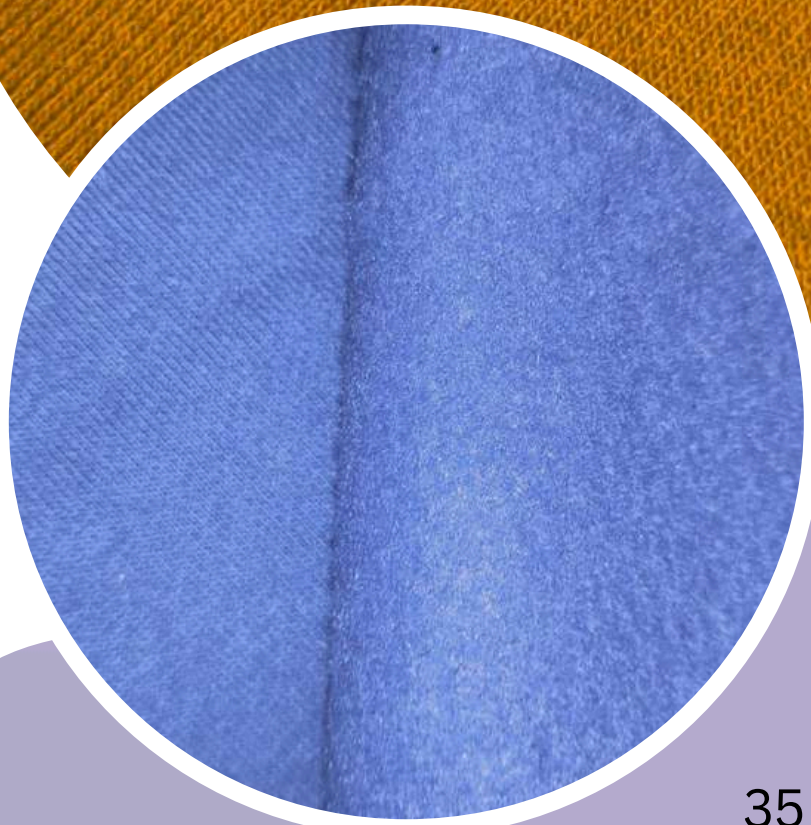
✨ **Key Characteristics:**

- Warmth
- Soft and comfortable
- Versitality
- Durable
- **Comp:** mix% Polyester&ccotton

✨ **Application :**

- Activewear
- Loungewear
- blankets





# SAP FLEECE

Sap fleece fabric refers to the synthetic fibres used like, synthetic artificial polyester or which is a type of modern fleece made from polyester.

✨ **Key Characteristics:**

- Warm&insulating
- Moisture wicking
- Breathable
- Durable
- **Comp:** 100% Polyester

✨ **Application :**

- Activewear
- Hoodies
- Sweatshirts
- blankets

# THERMAL

Thermal is a soft lightweight and warm fabric often made from synthetic material like polyester.

✨ **Key Characteristics:**

- Warm
- Lightweight
- quick drying
- Breathable
- **Comp:** 100% Polyester

✨ **Application :**

- Vests
- Blankets
- Linings
- Outdoor wear for activity like hiking and camping
